

October  
2013

To whom it may Concern,

Aircraft Fasteners International LLC is a distributor and we do not manufacture product of any kind. We rely on our suppliers' procurement specifications and our standard quality requirements found in our terms and conditions. Therefore any inquiry about the conflict of minerals (Dodd---Frank Wall Street Reform Act) needs to be addressed to the manufacturers of the product you purchase. We question all our vendors that use any of the designated minerals if they are conducting a reasonable *"country of origin as described in the **"Final Rule" dated Nov. 13, 2012.***

For your convenience we have attached the "Conflict of Minerals Statements" we received from the following manufacturers:  
MacLean Esna, Paolo Astori, and SPS.

If you need a Statement from any other manufacturer, please contact them directly.

Sincerely,

Nelson  
Valderrama, QM
